

TB01

TB Series for large vehicles

SPCC stainless steel one shot press for solid construction

The main bone thickness is 1.5mm, the bone frame is stable and does not shake when scraping rain

Inset refined stainless steel, curved design to maintain the wiper without deformation

Product features

Metal skeleton

SPCC stainless steel + stamping process + electrostatic spraying process
high strength skeleton, corrosion resistant

Rubber strip

Rubber – Malaysian SMR-cv60 natural rubber
Silicone – imported from Japan

High strength adapters

POM material, strong toughness, not easy to age and break, to ensure that the wiper and the rocker arm are firmly connected and do not fall off

Adaptive structural design

The wipers are lined with a memory steel bar that adjusts itself to the window for a clean, leak-free fit.

ADAPTER

PA419

LENGTH

INCH 40"

MM 1000

TB02

TB Series for large vehicles

Product features

Metal skeleton

SPCC stainless steel + stamping process + electrostatic spraying process high strength skeleton, corrosion resistant

Rubber strip

Rubber – Malaysian SMR-cv60 natural rubber
Silicone – imported from Japan

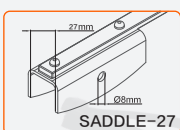

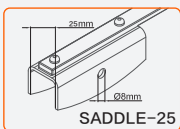

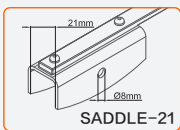

High strength adapters

POM material, strong toughness, not easy to age and break, to ensure that the wiper and the rocker arm are firmly connected and do not fall off

Adaptive structural design

The wipers are lined with a memory steel bar that adjusts itself to the window for a clean, leak-free fit.

TB09

TB大车专用系列

Suitable for US version of BMW and other North American SUVs
Aerodynamic design of the back air holes, the wind pressure, the wipers fit tightly, and the rain scraping is more stable.

Product features

Metal skeleton

SPCC stainless steel + stamping process + electrostatic spraying process high strength skeleton, corrosion resistant

Rubber strip

Rubber – Malaysian SMR-cv60 natural rubber
Silicone – imported from Japan

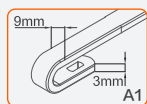

High strength adapters

POM material, strong toughness, not easy to age and break, to ensure that the wiper and the rocker arm are firmly connected and do not fall off

Adaptive structural design
